PRODUCT PROGRAM 2023

INDUSTRIAL SOLUTION

WWW.YESMACHINERY.AE

**DISCOVER MACHINES
AND POSSIBILITIES**

YES, YOU DESERVE TO KNOW EVERYTHING.
FROM ALL AVAILABLE INFO TO PHOTOS OF PRODUCT & ITS
APPLICATIONS TO VIDEOS.
BUT HOW COULD WE CONVEY ALL THESE TO YOU THROUGH
A CATALOGUE?

AND HOW COULD WE KEEP IT INTERESTING AT THE SAME TIME.
WE ALL ENJOYED COMICS GROWING UP, THE BRIGHT COLORS & THOSE SPECIAL
FONTS IN THE SPEECH BUBBLES, MADE IT LOOK SO COOL.

HENCE THE IDEA OF THIS CATALOGUE, SERIOUS THINGS CONVEYED IN THE
MOST CASUAL WAY. IN FACT IT REPRESENTS US, WE ARE SIMPLE, EASY
PEOPLE, HANDLING BIG RESPONSIBILITIES WHICH WE BELIEVE IS TO OFFER
YOU THE BEST.

AGAINST EACH PRODUCT IN THIS CATALOGUE IS A QR CODE.

IF THE PRODUCT INTERESTS YOU, TAKE YOUR SMART PHONE /
TABLET, SCAN THE QR CODE AND YOU WILL REACH THAT
PARTICULAR PRODUCT PAGE ON OUR WEBSITE WITH LOADS OF INFO.
AND IF THAT COULDN'T SATISFY YOU ENOUGH, JUST DROP
IN AN EMAIL OR CALL US, WE ARE MORE THAN HAPPY TO HELP.

WE HOPE YOU ENJOY THIS CATALOGUE AND IT BRINGS US
MORE CLOSER.

ON BEHALF OF THE ENTIRE YES "MEN",

a brand of AxA Group

VACUUM LIFTING

 **Fezer**

Vacuum Lifting

The vacuum lifters stand for absolutely gentle handling, efficient and ergonomic working processes with the highest operational safety. Vacuum lifters are suitable for horizontal transport, swiveling, or turning over plate materials of all kinds.

Turning over plates or materials of all kinds

Metal Sheet Lifting

fork mounted vacuum lifter

Pipe lifting

lifting of paint pails

Carton lifting

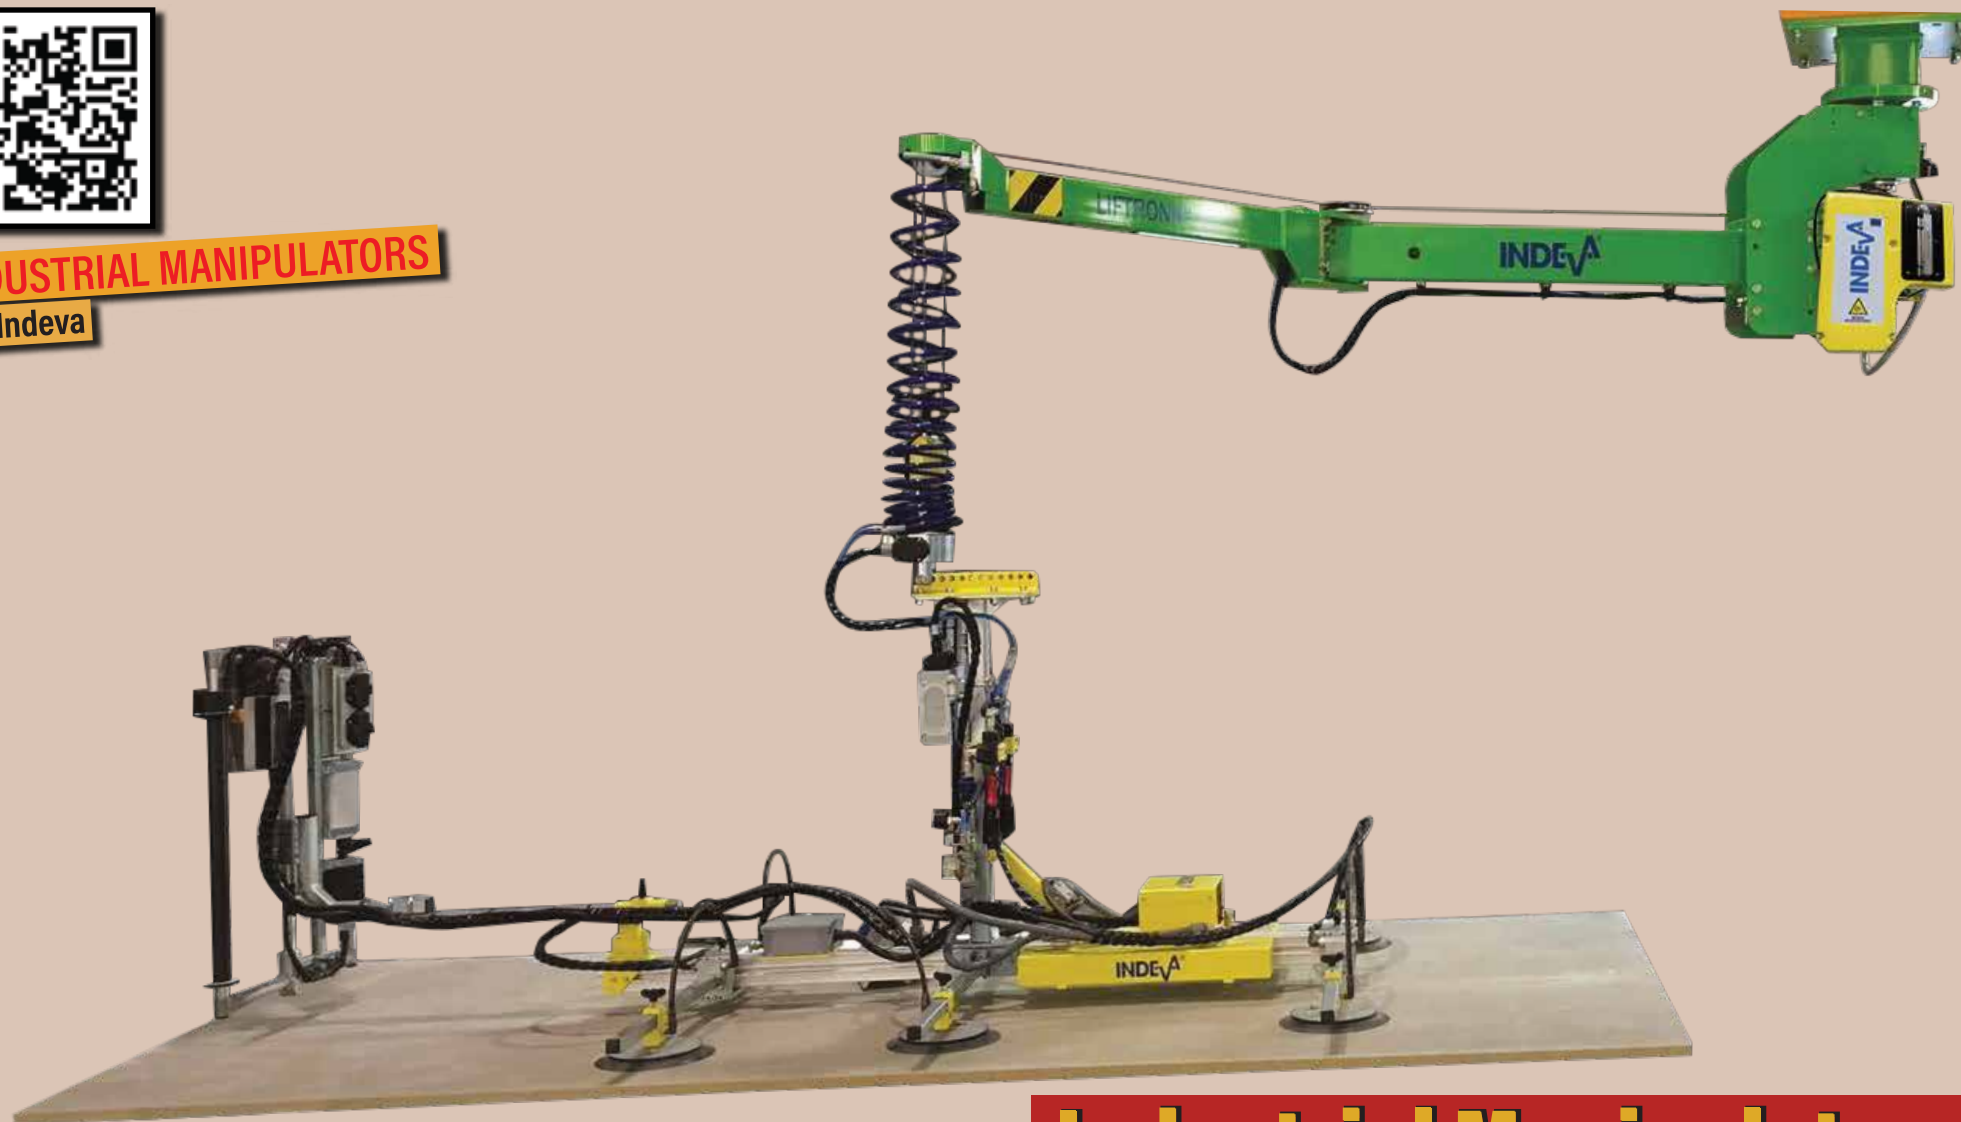

Key Features

- Customized solutions
- Suitable for lifting materials from 5 kg to 40 Ton
- Can be used in both indoor and outdoor applications
- The dry, wet, greasy, rough, dusty surfaces can be lifted
- Both 90 degree and 180-degree swivel option are available

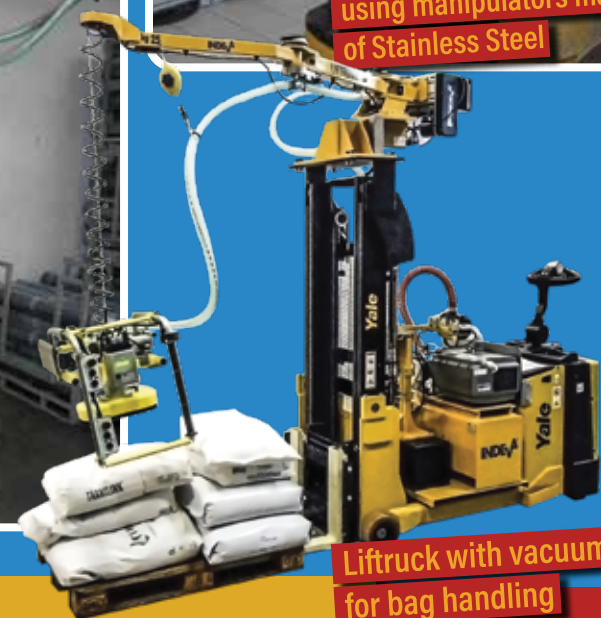

INDUSTRIAL MANIPULATORS

 Indeva

Industrial Manipulators

The Industrial Manipulators are smart and electronically controlled manual load handling systems. It can be applied to different supports as a column with Orbit Arm, ceiling, overhead rail and bridge crane system, Liftruck.

Key Features

- Both pneumatic and electrical models are available
- Auto weight sense and automatic load weight balancing
- High precision in load placing
- Ergonomic and effortless load handling and Quick movements

LIGHT CRANE SYSTEM

 **EEPOS**

Light Crane System

eepos is the leading manufacturer of crane systems, like overhead cranes, aluminum rails, aluminum crane, jib crane, light crane kit, rail trolley, overhead rail in Germany. As the foremost manufacturer and supplier of modular light, overhead crane systems in Europe, eepos is ideally placed to supply either an upgrade to your existing overhead crane system or provide a bespoke designed system for a brand new manufacturing process.

Automated Cranes for precision handling

Easy to install in any existing facility

Motorized version for easy transportation of heavy loads

Key Features

- Individually configurable
- Modular structure
- Compact & robust construction
- Spacious interior design
- Bundle of electricity, data, compressed air, gas, and cooling water
- Clean, safe, and flexible solution for energy supply
- Item compatible slots for individual attachments

Jib Crane with Aluminium Profile

Media Columns for Electrical, Pneumatic, or communication cabling

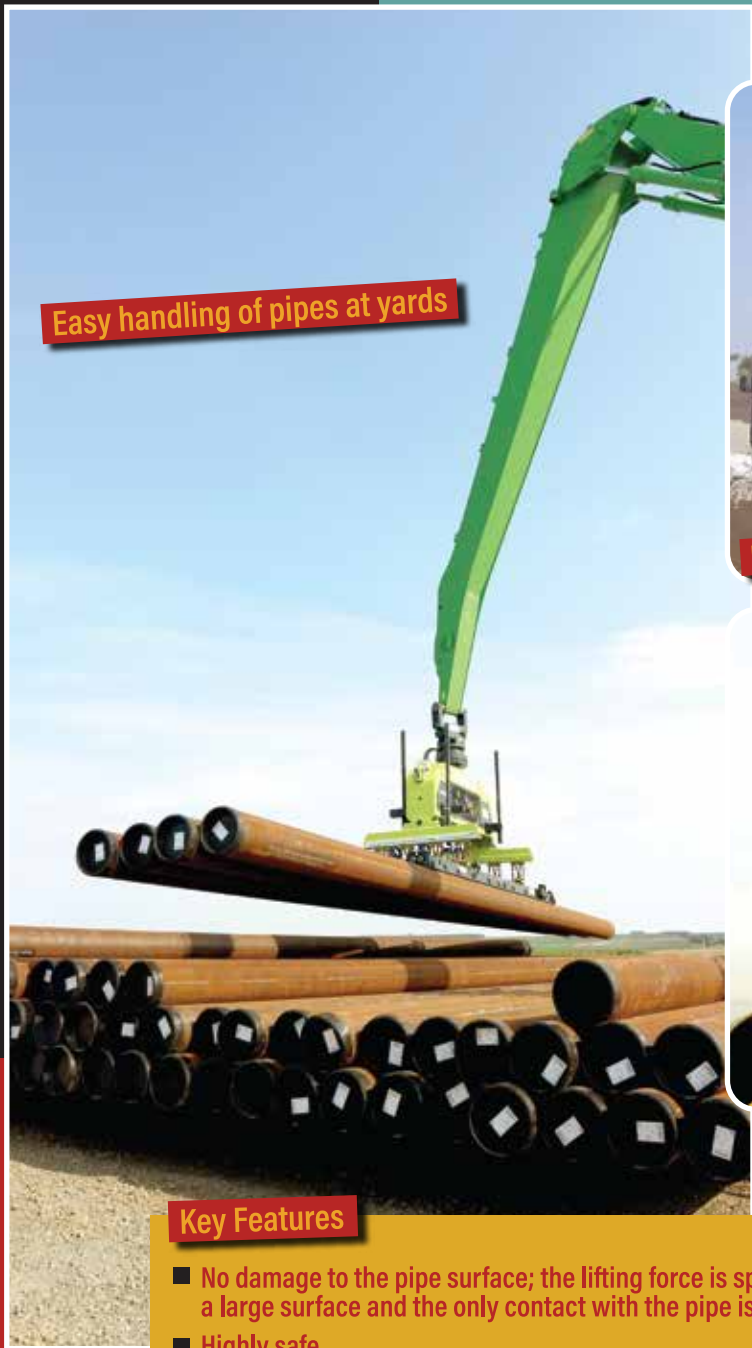

PIPE VACUUM LIFTING

 Vlentec

Pipe Vacuum Lifting

Vlentec has a range of light and heavy-duty vacuum pipe lifters to drastically increase worksite safety and cut pipe handling time by a factor of 10! By using a vacuum pipe lifter, attributes such as hooks, magnets, chains, and slings are replaced by one or more suction pads to lift Pipes. The suction pads are available for all pipe dimensions.

Easy handling of pipes at yards

Handling of large diameter pipes

Safe operation even on rusted surface

For use with cranes

Can lift painted pipes

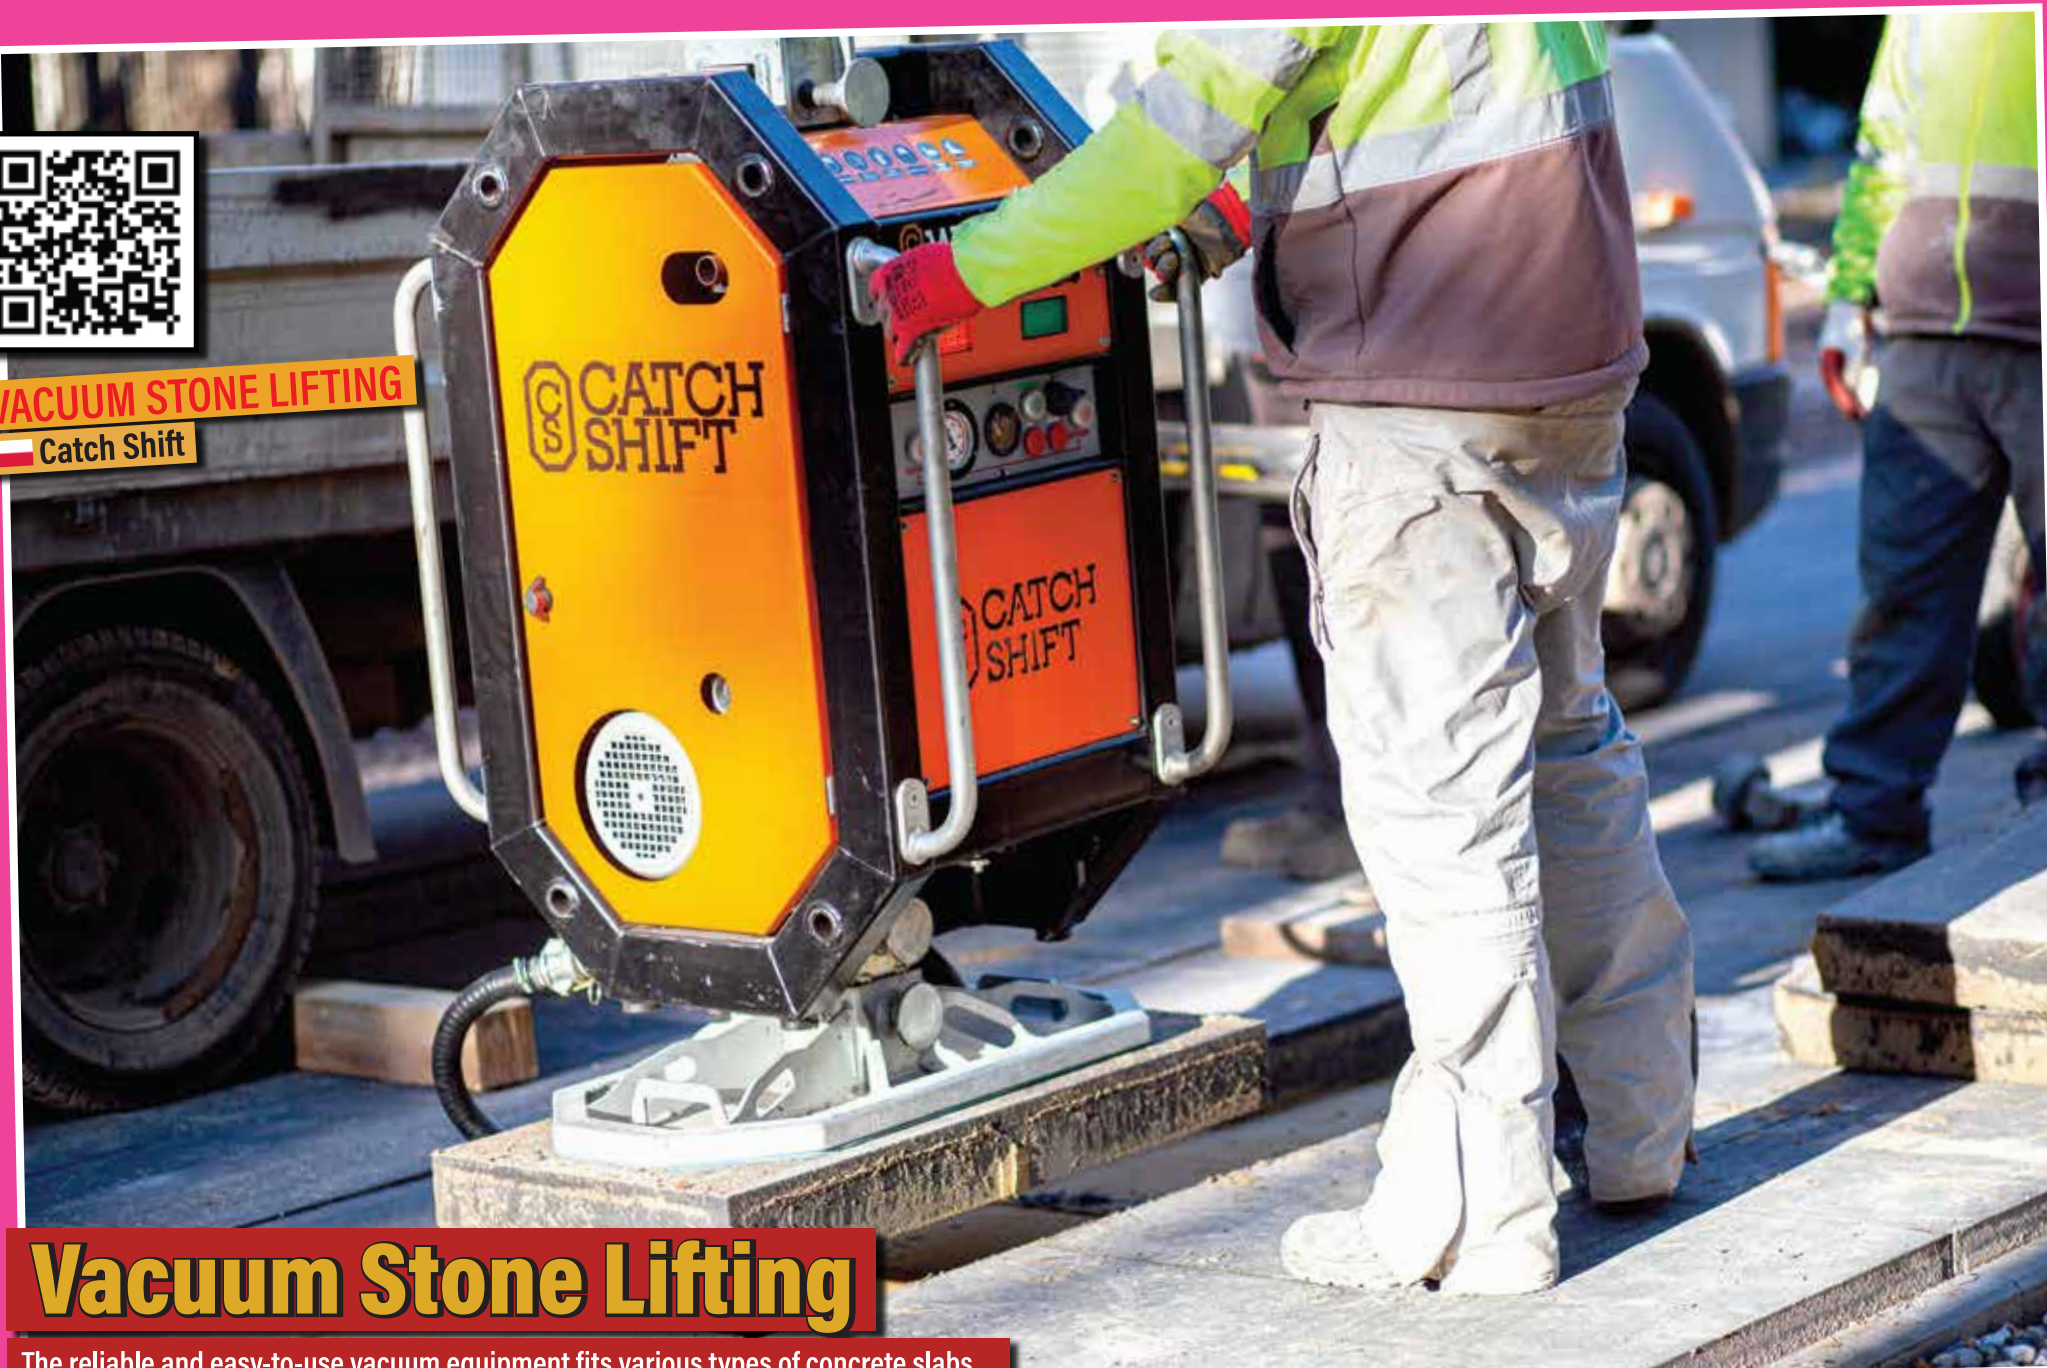

Key Features

- No damage to the pipe surface; the lifting force is spread over a large surface and the only contact with the pipe is a soft rubber seal.
- Highly safe
- 10x faster pipe handling than pipe hooks or slings.
- Less staff is required.
- Works in all environments; wind, dust, heat, rain, snow, or ice is not an issue.
- Skids are not required when stockpiling.
- Wireless remote-controlled, no tangled wires.

VACUUM STONE LIFTING

 **Catch Shift**

Vacuum Stone Lifting

The reliable and easy-to-use vacuum equipment fits various types of concrete slabs and stone elements together on time and without having to worry.

Can be attached to any lifting equipment

Single Phase AC Power option

Wolf 4000

Easily grips coarse surfaces

For highly permeable stair blocks

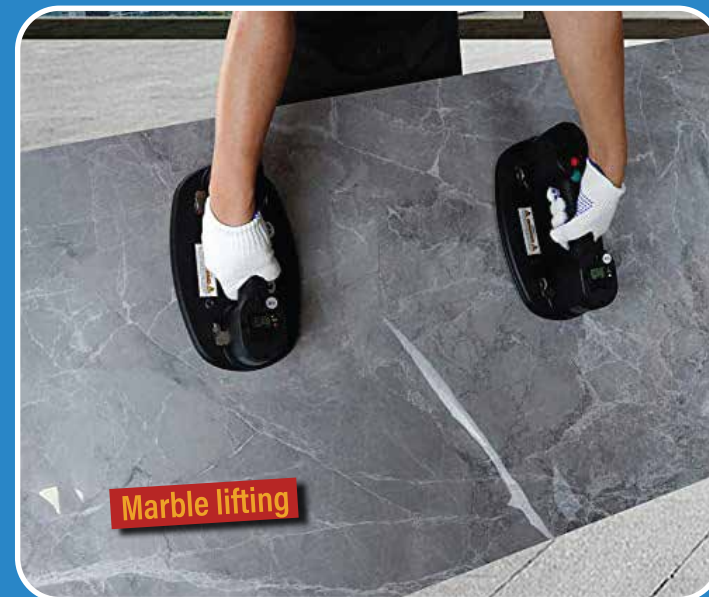

Bear 6000 for 6000 Kg Lifting

Key Features

- Used for lifting concrete, marble, pavers, granite, GRP
- Vacuum Technology leaving no marks on the surface
- Available in AC Power, Battery & Petrol Engine operation
- Suitable for rough, smooth and also for materials with high permeability
- Capacity up to 6000 Kg
- Can be operated with various lifting devices

Metal sheet lifting

Marble lifting

floor tile lifting

stone lift

grabo-hardcase

Portable Electric Vacuum Lifter

Portable vacuum lifter for lifting various products

Key Features

- Portable vacuum lifter
- Can handle smooth and uneven surfaces
- External Charger
- Battery operated
- High efficiency
- Various seals for different surfaces

Capacity: Up to 170 Kg

 **Grabo**

Available with suction plate

Suction Cup Covers for non-marking

Available in different sizes

Tailor made for client needs

Indoor and outdoor use

Suction Cups

EuroTek suction cups are characterized by their high-quality materials, durability, versatility, customization, vacuum power, and ease of installation. These features make EuroTek suction cups ideal for a wide range of industrial applications, such as packaging, handling, automation, and robotics.

Key Features

- Made from high-quality materials such as silicone, NBR, and Viton, which offer excellent resistance to chemicals, temperature, and wear.
- Designed to be durable and withstand harsh environments.
- Available in a wide range of sizes, shapes, and materials, which makes them suitable for a variety of applications
- They can be used to handle different types of objects, including smooth, flat, curved, and porous surfaces.
- Customized suction cups that can be tailored to the specific needs of the customer.
- Easy installation which saves time and reduces the need for specialized tools or expertise

COUNTER WEIGHT CRANES

Flex Lifting

Counter Weight Cranes

Lifting, maneuvering & transportation of heavy loads

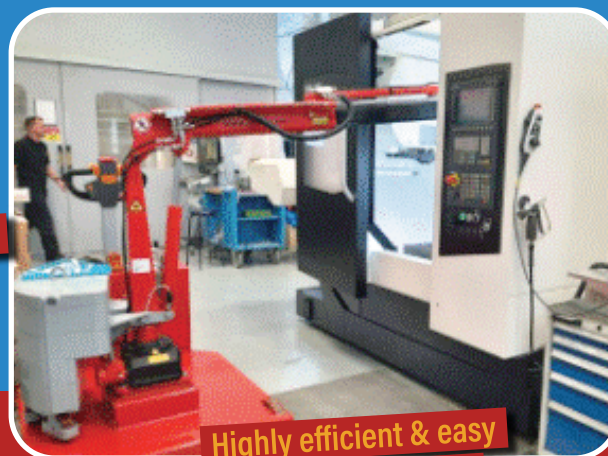

Motorized as well as manual lifting and motion variants

Available in different capacities

Compact counterweight design with minimal footprint

Highly efficient & easy to use mobile cranes

Easy maneuvering with high quality wheel

Key Features

- Portable cranes
- Counter balanced design
- Battery operated
- Easy to move
- Easy handling

SANDWICH PANEL & GLASS LIFTER

VACUUM LIFTING
VIAVAC

SmartGroup

PANEL & GLASS LIFTER

 **Viavac**

SANDWICH PANEL AND GLASS LIFTERS

The company operates on the principle of having Suction pads as the proven and ideal tool for simple, safe, and damage-free installation of glass and sandwich panels. This glass and sandwich panel lifter can be used for various flat and profiled panels as well as glass. They aim at simplifying the time-consuming and risky processes of Installation of glass and panels.

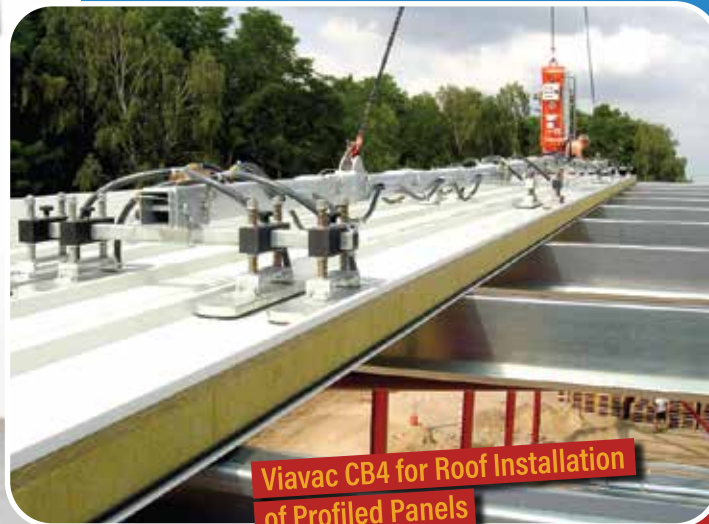

Viavac GB2-375 with Crane Arm for installation with Forklift

Vacuum Lifter for Facade Installation

Vacuum Lifter for Skylight Installation

Viavac CB4 for Roof Installation of Profiled Panels

Vacuum Lifter for Curved Glass

Key Features

- Ideal tool for simple, safe, and damage-free installation of glass and sandwich panels.
- Capacity up to 1800 Kgs for Glass and 800 Kgs for Sandwich Panel
- Suitable for glass of various sizes, be it small glass pieces or for large jumbo glasses
- Suitable for Sandwich Panels up to 28m length
- Capability of roof or wall installation
- Modular units which can be configured based on capacity or size
- Complies with all European safety standards
- A battery-powered, Alarm will warn when the battery runs low
- Alarm for indicating low vacuum its improves operator safety
- It can be swiveled, and the suction cup is equipped with an exchangeable seal profile so it can be replaced easily

GLASS LIFTING ROBOT

Smart Group

GLASS LIFTING ROBOT

Smart Group, Denmark offers the most revolutionary glazing robot with unmatched features. The first of a glass lifting robot with a lifting height of 5.8 meters and extension in front of the wheels up to 3.5 - 4.5 meters. Suitable for glass, panels, curved glass, concrete, metal sheet, or any non-porous lifting, manipulation, transportation, and installation. The ideal choice for glass installers is to get their installation work done quickly and safely.

Mobile Glazing Robots for Installation of Windows

Accuracy in movement up to 1mm

Glazing Robots used for Glass Picking from Stand & Transportation to Installation Location

Smart Group SG - 650 suitable for outdoor operation

Smart Group SG - 650 for extension up to 4.5 meter

Key Features

- Lifting height up to 5.8 meters.
- Extension in front of the wheels 3.5 - 4.5 meters. with more lifting capacity.
- Width, between 650 - 690 mm.
- Potentiometer for regulating working speed.

- Wireless remote option for all machines.
- Powerful front-wheel drive.
- Running outdoor as well as indoor.
- Nonwelded for a better environment.

Lifting mounting of wheels
W-mount-thumb

Compact-Vblock

Reel handling machine

Electrical Manual Lifters

Lifting and manipulation of reels, drums, crates and boxes etc. to improve ergonomics & preventing bending & weight lifting by operators

Key Features

- Portable lifters
- Light weight
- Noiseless
- Various tools for different applications
- Battery operated
- Ergonomic operation
- Available in stainless steel design
- Customized designs are possible

 Hovmand

Drum Handling equipment

efficient handling of metal, plastics and rimmed or non-rimmed drums

Key Features

- Over 200 models
- Stainless steel version available
- Tilting options
- Easy to use
- Spark resistant models available

Handling capacity up to 1136 kg in weight or up to 55 Gallons drums

ELECTRIC TUGS

 **Zally's**

Electric Tugs

Zally's is the pioneer in offering logistics solutions for varying requirements related to wheeled loads through their range of professional electric vehicles. They have the widest range of utility electric tugs, battery-powered tugs, electric tow tugs, cart and trolley movers, electric trolleys, and warehouse electric trolleys.

For easy transportation of multiple wheeled trolleys

For use in muddy areas

Pedestrian Tug with trailer for bin transportation

JESPI with Tractor Tires for Farm Use

Ideal for towing garbage bins

Suitable for all terrains

Key Features

- Available in Towing, Loading & Man on board variant
- Various hitches option in mechanical & electrical options
- Independent of trolleys
- No special driving skill required
- No maintenance design

capacity: up to 15T

4 X 100 Tons SPMT for use in Shipyards

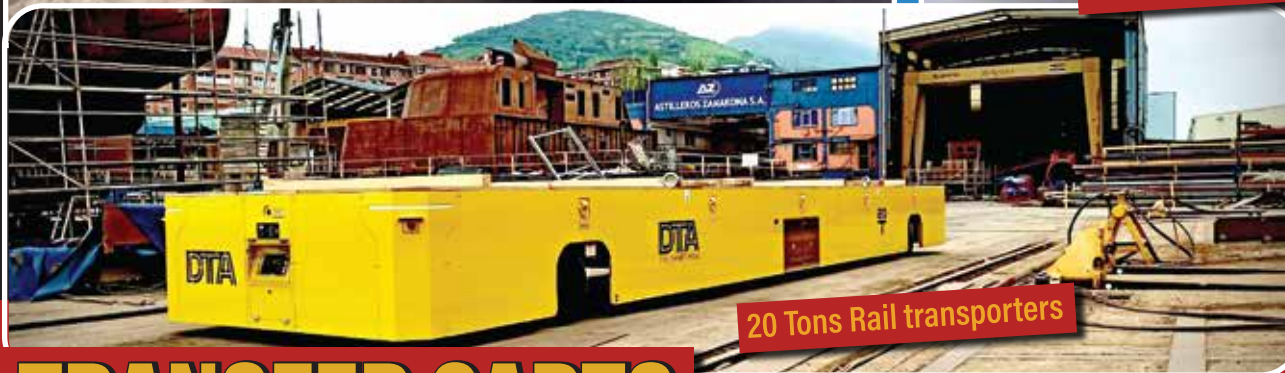

With lifting & lowering function to load & unload without cranes

20 Tons Rail transporters

SPMTs used in Windmill Industry

20 Tons Rail transporters

Heavy Duty Transporter

TRANSFER CARTS

The biggest challenge on a shop floor is the transportation of heavy and bulky materials safely and with minimum effort. With our transfer carts, the handling of such heavy and bulky materials becomes an easy task. The benefit of a rail cart is to have a safe passage clear of any obstacles and defined workspace allocation. This eliminates the use of forklifts or cranes which are the reason for numerous accidents. The transfer carts are most suitable for critical material handling in tight spaces.

Key Features

- Electric Transfer Carts
- Fully Automatic Solution or AGV
- Heavy Duty Transporters
- Tailor Made Solutions

Heavy-duty AGVs operating using SLAM navigation are the ideal choice for driverless operation. We have solutions from 1 ton to 1200 tons

Installation in pits for floor level lifter top

Easy maintenance

Loading or unloading from vans made easy

Working without bending

Heavy products can be easily unloaded

Scissor Lifter

For improving ergonomics, lifting heavy materials and transportation

capacity: Up to 5 Tons

Key Features

- Robust build
- Available in foot pump, battery & electric variant
- High Quality Castors
- Various Platforms for client needs

 **R.Beck Maschinenbav**

PU Roller Castors

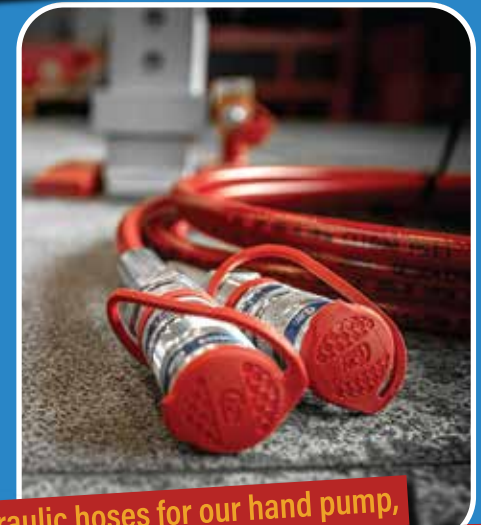

Transfer through Electric Trolleys

Hydraulic Jack and Trolley in Tandem

Transport Trolley

Hydraulic hoses for our hand pump, air hydraulic pump, and electrical pumps

Hydraulic Jacks & Trolleys

Jung jacks and transport trolleys are equipment commonly used in material handling and transportation applications.

Key Features

- Heavy load moved with ease
- Hydraulic lifting mechanism
- Wide base providing stability and preventing slipping
- Adjustable lifting heights for accommodating various objects
- Easy maneuvering using high quality castors
- Various capacities
- Available in manual, electrical and pneumatic variants

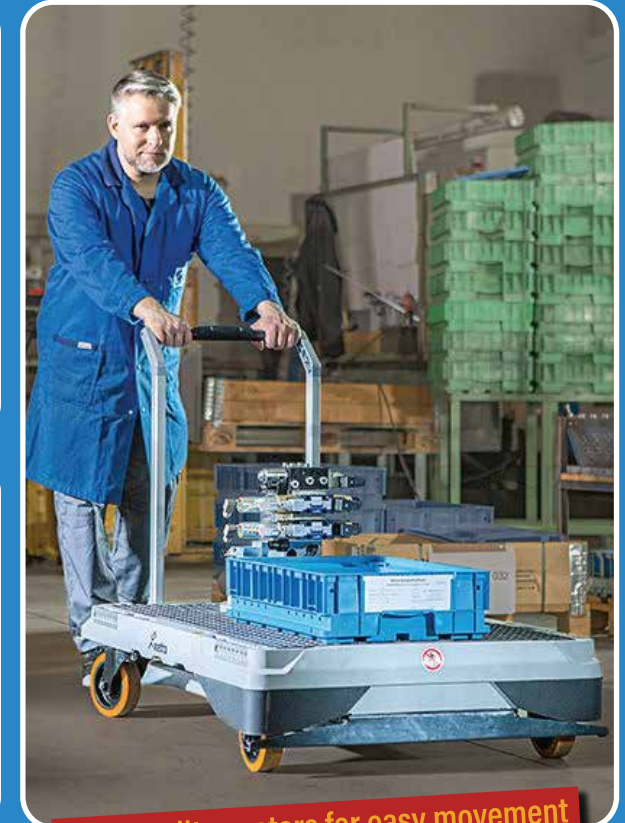

Battery Operated

Easy Loading & Unloading to a Van

High Quality castors for easy movement

Companion Lifting Trolleys

Xetto trolley is designed to handle a wide range of loads in various industries, including logistics, warehousing, manufacturing, and construction. It can be used to transport boxes, pallets, equipment, and other heavy items with ease.

Key Features

- Compact Design that allows it to fit into tight spaces and narrow aisles.
- Equipped with four casters that provide excellent maneuverability in tight spaces. The casters are designed to absorb shocks and vibrations, ensuring a smooth and stable ride.
- Capable of lifting heavy loads of up to 250 kg (550 lbs) with ease.
- Designed with ergonomics in mind, ensuring that operators can work comfortably and safely for extended periods.
- Several safety features, including a safety brake, overload protection, and anti-roll-off protection.

+ Xetto

ROLL CONTAINER, STILLAGES & DOLLIES

🇫🇮 K. Hartwall

Roll Container, Stillages & Dollies

K. Hartwall is a leading provider of logistics solutions that help businesses to optimize their operations and reduce their environmental impact. K. Hartwall also provides various logistics services, such as supply chain optimization, warehouse design, and project management. These services help customers to streamline their operations and increase efficiency, while reducing costs and environmental impact.

Compactainer for Postal Use

Easy transportation of crates

Easily foldable

Foldia XL in store

Stackable Parcel Cage for storage

Smart Cube for transportation without wrapping

Key Features

- Modularity as they can be easily customized and adapted to different requirements
- Ergonomics as they are easy and safe to handle.
- Sustainability as they offer products made from recycled materials
- Wide range of customization options for their products, such as different colors, logos, and sizes.
- Designed to withstand the rigors of daily use and transportation
- Easy to clean

WAREHOUSING & STORAGE

McCue

EFFIMAT®

INDUSTRIAL SAFETY BARRIERS

 **McCue**

Industrial Safety Barriers

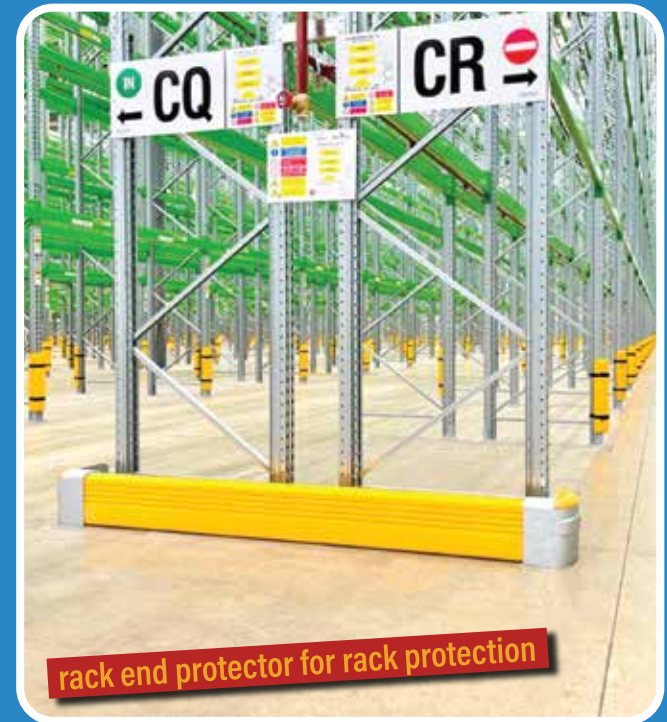

Flexible safety barriers for protecting pedestrians, racks, column and machineries

bollard protection for machines

bollard protection for machines

rack end protector for rack protection

protection rack legs

pedestrian barrier

crash barrier protection

Key Features

- Flexible
- Maintenance free
- Easy to configure
- Available in various designs and impact resistance
- High Durability
- Easy Installation
- Modular

Vertical Storage System

EffiMat's automated storage and retrieval systems are characterized by their vertical storage, automated retrieval, high throughput, flexibility, real-time inventory tracking, and ergonomics. These features make EffiMat's systems ideal for small parts handling in a wide range of industries, such as manufacturing, distribution, and healthcare.

Key Features

- Vertical storage to maximize space utilization, which is particularly useful in facilities with limited floor space
- Designed for automated retrieval, which minimizes the need for manual labor and increases efficiency.
- High throughput as they can handle a large volume of items in a short amount of time. The systems can be configured to operate at a speed of up to 800 picks per hour
- Highly flexible and be configured with different bin sizes, picking strategies, and software modules
- Real-time inventory tracking
- Easy and safe to use

PACKAGING

INDUSTRIAL STRETCH WRAPPING

 Atlanta

ATLANTA

Industrial stretch wrapping

ATLANTA wrapping machines are specialized in catering to the packaging needs of food, beverage, logistics etc

Synthesi wrapping paint buckets

Key Features

- Ergonomics
- Less film consumption
- Easy operations
- Less packaging time
- Suitable for large loads
- High efficiency

sfera wrapping long pallet

Synthesi wrapping carton boxes

Fully automatic machine

Fully automatic machine

MOBILE STRAPPING MACHINE

 **Ergopack**

Mobile Strapping Machine

Ergonomic strapping of pallets standing upright, without bending and walking around the pallet

ergopack pallet strapping

Strapping up to height of 3000mm

Special Accessories for strapping without pallets

Key Features

- easy operation
- no bending
- battery powered
- Mobile
- less time
- strapping & sealing in one machine

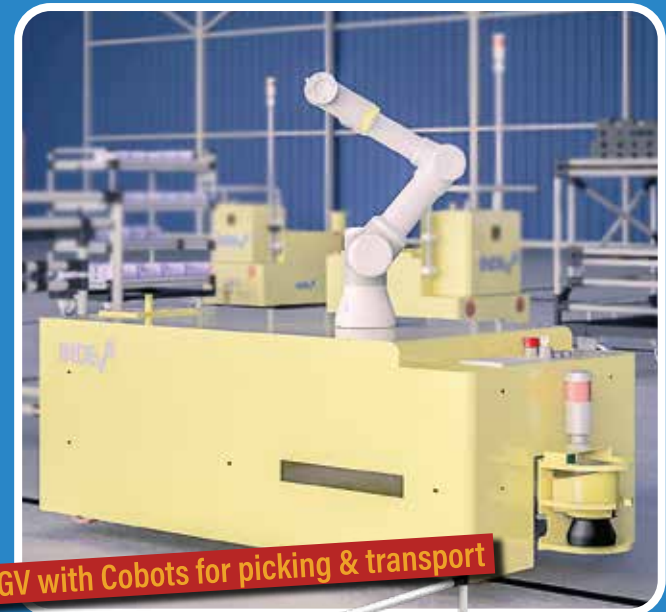

Portable & battery operated for multi location use

Strapping without bending or walking around the pallets

ASSEMBLY & LEAN

INDEVA[®]
INTELLIGENT DEVICES FOR HANDLING

AGV with Cobots for picking & transport

Customized solutions for client needs

Tugger Type AGV

Flexibility integration with any process or automation

Automatic Guided Vehicles

Automated Material Handling in a facility

Capacity up to 1.5 Tons

Key Features

- Precise and safe operation
- Efficient, reliable and flexible transport
- Low running and maintenance cost
- Easy to assemble and easy to maintain
- Advanced programming interface

 Indeva

Lean System

The lean system comprises a wide range of components including abrasion-resistant plastic-coated steel tubes, steel joints, roller tracks, and accessories. This enables you to design and build a variety of structures to suit any need within the manufacturing process.

Key Features

- Completely Modular
- Flexible
- Reusable
- Various color option

Capacity :
Varies according to design

 Indeva

VISUAL MANAGEMENT TOOLS

ORGATEX®

VISUAL MANAGEMENT TOOLS

 **orgatex**

Visual Management Tools

Visual Management Tools provides innovative and effective Lean Visual Management Tools and Solutions in manufacturing and service organizations applying Lean principles and processes. The innovative products are manufactured with highest quality with design suitable to work in busiest industrial spaces even with frequent forklift movements

Applications

- Container labelling
- Material handling
- Visual boards
- Document holders
- Insert boards
- Safety sign
- Floor marking
- Storage labelling

Lean system

Marking for storage area

safety sign

Pallet holder

Pedestrian marking and safety floor signs

Rack label

Key Features

- Quality
- Durability
- Easy to install
- High adhesive capacity

INDUSTRIAL FLOORING

Fortelock

Commercial places

Easy to install

Forklift resistant

Hospitals and high hygiene areas

Used in Gymansiums

Industrial Floor Tiles and Mats

Fortelock tiles are a type of interlocking floor tile that is designed for industrial and commercial applications.

Key Features

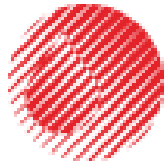

Made from high-quality materials, such as PVC, that can withstand heavy foot traffic, machinery, and chemicals.

- Designed for easy installation, which minimizes downtime and ensures faster implementation. They can be installed using simple tools and require minimal technical expertise.
- Features an interlocking design that allows tiles to snap together easily and securely. This creates a seamless surface that is resistant to moisture, dirt, and debris.
- Available in various sizes, colors, and patterns, which makes them highly customizable. This allows customers to select the right tile that suits their specific needs and requirements.
- Slip-resistant surface that provides excellent traction, even in wet conditions. This helps to reduce the risk of slips, trips, and falls, which can lead to injuries and liability issues.
- Easy to clean and maintain, which ensures a hygienic and safe working environment. They can be cleaned using standard cleaning equipment, such as a mop and bucket, and do not require specialized cleaning solutions.

 **fortelock**

PRINTING & MARKING

EBS®
Ink-Jet Systems

Print Logos or Text

Industrial Touch Screen

Long Lasting & Quick Drying Ink

Omni directional printing

Print on multiple surfaces

Ink Marking

The EBS Handjet Printer is a handheld, portable inkjet printer designed for printing high-quality text, barcodes, logos, and graphics onto a wide range of surfaces.

Key Features

- Portable and lightweight
- Wireless connectivity: The EBS Handjet Printer has wireless connectivity options such as Wi-Fi, Bluetooth, and USB, making it easy to transfer data from different devices and systems.
- Easy to use with user-friendly interface, touch screen display and simple operating buttons
- High-quality printing
- Can print on a wide range of surfaces, including paper, cardboard, plastic, metal, glass, and wood.
- Long battery life
- Durable and reliable

INDUSTRIAL CLEANING

DUST COLLECTORS

 **Ulmatec**

ULMATEC
extraction systems

Dust Collectors

Modular Dust Collection system for various combinations tailor made to suit different applications. The product range includes industrial dedusters, welding fumes filters, hall extraction systems, industrial extractors, oil mist separators, wet separators, filter towers and associated system components such as pre-separators, extraction arms & extraction tables.

Key Features

- Modular build
- Vertical & Horizontal arrangement to suit varying space constraints
- Wide range of accessories
- Suitable for fume & dust
- Also available in ATEX & EX

Capacity: Any capacity can be manufactured based on application

Centralized collection with Suction Walls for Grinding

Extraction Arms with radius up to 4 meters

Hall Extraction Systems

Extraction Booth

Portable Dust Collector

INDUSTRIAL VACUUM CLEANER

Wieland

Industrial Vacuum Cleaner

Industrial vacuum cleaner caters to almost all industries like construction, power plants, plastics, printing, agricultural, metalworking, wood, foundry, etc. It is used in handling all industrial wastes such as sand, gravel, dust, metal chips, foundry wastes, and explosive materials.

Available for Catalyst handling & ATEX Zones

Truck Mounted Vacuum Cleaner for bulk material handling

Various accessories are available

Intercept Hopper for increasing collection capacity

Centralized Vacuum Cleaner with Pipe Network

Portable Vacuum Cleaners for various applications

Key Features

- Stationary, portable, and truck-mounted models are available
- High vacuum for swarf, grease, oil, liquids, and dust
- Power is ranging from 3kW to 300kW
- High-quality filters
- Pneumatic air shock filter cleaning technology
- Can be used in ATEX areas

Capacity: up to 60 tons per hour suction

Ride-On Sweeper for larger area cleaning

Room Cleaning Robot with Fleet Management Software

Steam Cleaning for sanitization

Mechanical Floor Sweeper

Ride-On Scrubber Drier for large areas

Single Disc Machine for Deep Cleaning

Walk Behind Scrubber Drier

Wet & Dry Vacuum Cleaner

Cleaning Machines & Robots

Cleanfix is a brand of cleaning equipment that offers a range of innovative and high-quality solutions for professional cleaning applications. Cleanfix products an ideal choice for professional cleaning applications in a wide range of industries, including healthcare, hospitality, education, and facilities management.

Key Features

- Equipped with powerful motors, high-quality brushes, and advanced filtration systems that ensure thorough cleaning results quickly & efficiently
- Highly versatile with wide range of cleaning applications. ■ Ease of Use as the equipment are user-friendly which are easy to operate and require minimal training.
- Made from high-quality materials, such as stainless steel, aluminum, and durable plastics, that are designed to withstand heavy use and harsh cleaning environments.
- Equipped with various safety features, such as overload protection, automatic shut-off, and low noise levels, that ensure a safe and comfortable working environment for operators.
- Designed for energy-efficient and eco-friendly cleaning solutions, which reduces the impact on the environment.

+ Cleanfix

All Wheel Drive for catering any terrain

Quick Change as a Flail Mower

Quick Change as a Tipping Shovel

Quick Change as Lawn Edger

Quick Change as an Lawn Mower

Road Sweeper & Tool Carrier

Egholm tool carrier is a versatile machine that can be used for various applications in the maintenance and cleaning of outdoor areas such as parks, sports fields, villa communities, and golf courses.

Key Features

- Articulated steering system, which provides excellent maneuverability in tight spaces and allows it to turn on its own axis.
- Hydrostatic transmission system provides smooth and precise control of the machine's speed and direction, making it easy to operate and maneuver.
- Quick attachment system allows easy switching between different attachments such as mowers, sweepers, and more.
- All-wheel drive system provides excellent traction and stability on uneven terrain, steep slopes, and slippery surfaces.
- Spacious and ergonomic cabin with a comfortable seat, adjustable steering wheel, and easy-to-use controls, providing a comfortable and safe working environment for the operator.
- Low noise and emission levels
- Can be customized to suit your specific needs and requirements, with a wide range of attachments, accessories, and options available.

**Stationary High Pressure
Cleaner for factories**

**Portable Cold Water Pressure
Washer for regular use**

**Wide range of models
to suit customer needs**

**Trailer Mounted
Pressure Washers**

**Hot Water Pressure
Washer for oil & grease**

Pressure Washer

Dibo pressure washers are high-quality machines designed for heavy-duty cleaning applications.

Key Features

- High-pressure output up to 1000 bars suitable for removing stubborn dirt, grease, and grime from surfaces
- High water flow rate which helps to increase cleaning efficiency and speed.
- Available with electric, petrol & gas operated engines.
- Multiple nozzle options including turbo nozzles, which provide a powerful rotating water jet that can remove tough stains and dirt easily.
- Built with durable materials such as stainless steel, aluminum, and brass, making them highly resistant to corrosion and wear and tear.
- Designed with user-friendly controls and easy-to-read gauges, making them easy to operate and adjust for different cleaning tasks.
- Safety features such as automatic shut-off when the trigger is released and a safety valve to prevent overpressure.
- Sturdy wheels and a handle for easy movement, allowing to use them in different locations or move them around in a facility.
- Designed to be energy-efficient, with features such as a low-oil shutdown and a thermal relief valve that helps to prevent engine overheating.

Cleaning dirt & grease from floor without chemicals

Cleaning of Conveyor belts

Portable Steam Cleaners with continuous steam supply

Cleaning of food mixers from sticky substances

Stationary Steam Generators

Dry Steam Cleaners & High Pressure Cleaners

Frank dry steam cleaners are known for their efficiency in deep cleaning and sanitizing surfaces using only high-temperature steam.

Application: to remove stubborn stains, grease, and grime from a wide range of surfaces, including floors, carpets, upholstery, and even walls

Key Features

- Produce steam with temperatures above 138°C which effectively kills bacteria and other harmful microorganisms
- Chemical-free cleaning
- Adjustable steam settings that allow users to customize the amount of steam being used.
- Variety of attachments that make it easier to clean different surfaces, such as floors, upholstery, and grout.
- Fast heating time, with some models heating up in as little as 2 minutes
- Large water tank capacity or continuous supply variants
- Durable construction

Terry Cloth Folding Machine

Dryer

Laundry Machine

Medium Speed Washing Machine

**Industrial Washing Machine
for heavy clothes cleaning**

Flatwork ironers

Industrial Washing Machines

Stahl washing machines are known for their durability, reliability, and efficiency in commercial and industrial settings. Here are some of their key features:

Key Features

- Robust construction, built with heavy-duty materials such as stainless steel and galvanized steel, making them highly resistant to corrosion, wear and tear, and damage.
- Can handle a wide range of cleaning tasks, from delicate fabrics to heavy-duty workwear, with different washing programs, cycles, and options.
- Large washing capacities, ranging from 10kg to 120kg, allowing large batches of laundry in a single cycle.
- Designed to be energy-efficient, with features such as programmable wash cycles, water-saving options, and low-noise motors.
- User-friendly controls and easy-to-read displays, allowing program and monitor of the washing process easily.
- Safety features such as emergency stop buttons, door locks, and alarms to prevent accidents and ensure the safety of users.
- Customized to suit specific needs and requirements, with options such as automatic dosing systems, steam heating, and extraction systems.
